

Advancing Science by Enhancing Learning in the Laboratory

Upcoming Workshop

Dates: 9th to 11th July 2014
Location: Edith Cowan University, Joondalup.
Disciplines: Biology, Human Biology, Biochemistry, Paramedical Science.

Cost: We encourage academics to bring along a student. The cost per pair is AUD 550 (500AUD + GST).

This is the first time that an ASELL workshop is running in Western Australia. We are inviting educators and students from universities and high schools to present and participate in a series of laboratory based activities and discussions. This is a great opportunity to show case one of your practicals, participate in other practicals and network with other like-minded educators in your discipline. It has been suggested that educators submit lab activities which are considered well established or new untried activities for 'testing'.

A compilation of the laboratory activities will be made and given to each participant.

ASELL Objectives

The ASELL project aims to improve the quality of learning in science laboratories by making available student tested, peer reviewed experiments which are scientifically and educationally sound.
